

Abrading and polishing metal pipes without compromise

The powerful swiss pipe sander for the metal-worker has been developed. Poly-Romy/1, with its movable arm, fits around all places. It simplifies the abrading and polishing of metal pipes significantly. Yields smoother results than polishing by hand or with conventional sanders. It's a tool, which increases productivity enormously, built for professionals.

simple

- abrades and polishes 180° around the pipe to high polish in one step
- no unmounting of emery belts at the posts
- light-weight and handy

efficient

- enormous time-savings compared to conventional methods
- treats the inside and the outside of a pipe bend
- fits around all pipes

versatile

- quick and simple belt change
- infinitely adjustable belt speed
- economical use of emery VY'h
